UNIQUE SOLUTIONS FOR UNIQUE PROBLEMS

BAE Systems selects Display Solutions design for new NY Innovation Center

Display Solutions, Inc in Stow, MA announced today that it has recently completed a laboratory visual display system for BAE Systems Inc., Electronic and Integrated Solutions Division in Binghamton, NY. The visual system is located in BAE Systems new Steinmetz Center for Innovation. BAE Systems is a major supplier of aircraft control systems for military aircraft. The contract included system design, selection of visual system components and installation/setup of a multiple eye-point, curved screen visual system. The visual system uses Panasonic PTD 7700 3-chip DLP projectors and 3D Perception video warping/edge-blend video processing to produce a **140** degree HFOV x **40** degree VFOV image on a cylindrical screen surface. The visual system can switch between the two eye-points within 15 minutes allowing lab personnel to simulate various cockpit configurations being evaluated.

About Display Solutions, Inc

Display Solutions provides products and services to clients using state of the art multimedia video display technology for information display, education, entertainment and training. We are a leader in the design and installation of high performance visual display systems for the simulation and training industry. We service clients for simulation and high performance theater venues around the globe. Visit our Web site at <http://www.displaysolution.com>.
